

# GRIMALDI GROUP

The Grimaldi Group is deeply committed to the concept of a sustainable and environmental friendly mobility through the development of logistic solutions based on energy efficiency and GHG reduction principles. It is hereby stated that:

Customer Name	Reference Year
<b>LCT srl</b>	2016

by choosing, in 2016, the Motorways of the Sea of the Grimaldi Group as intermodal transport solution instead of the road option, has contributed to reduce the CO<sub>2</sub>e emissions in the atmosphere of:

**10837 ton CO<sub>2</sub>e**

The CO<sub>2</sub>e emissions reduction are evaluated in accordance with the “Rina rules for the validation of CO<sub>2</sub>e index calculation”.

Issued in Sardinia

On: 29 September 2017

This figure of CO<sub>2</sub>e, emissions reduction obtained choosing motorways of the sea of Grimaldi Group instead of road modality, has been evaluated using environmental indexes, defined as grCO<sub>2</sub>e/km, of 27 ships owned and operated by Grimaldi Group, these indexes are verified by Rina service spa through “Rina rules for the validation of CO<sub>2</sub>e index evaluation” with in-office and on-board specific audits to check data declared. The comparison of CO<sub>2</sub>e emissions has been done evaluating the CO<sub>2</sub> emitted to transport one trailer using one of 27 ships of motorways of the sea of Grimaldi Group against the CO<sub>2</sub>e emitted by one lorry Euro VI with trailer considering same departure and arrival points.
